The figure looks good, but how can we further increase demand?

The demand for any product, assuming the product is going to be marketable in the first place, is going to be based on the way we get our word out with advertisement and the price we attach to the product. If we have a great product, advertise a verywhere, but set the price too high for our projected customer base we will kill our demand. If our price is reasonable then a lot of our demand is going to revolve around the effectiveness of our advertising.

Feedback This Run:

Let's talk about channel performance prior to our board meeting

Our profits met expectations last quarter and are keeping us on track to meet our targets

Our analysts have closely predicted the internet growth, we may want to consider going on-line to establish a greater web presence.
